Summit Premium Cultured Almond Milk provides our lactose-intolerant customers with a creamy, tasty, calcium-enriched alternative to yogurt containing dairy!

A great deal of research has been done that shows almonds can help maintain and possibly lower cholesterol levels, an important factor in reducing heart-disease risk. The combination of protein, fiber and monounsaturated fat found in almonds also has been shown to help people feel full, which tends to lower food consumption throughout the day.

Where does Summit Premium Almonds come from?

California
